Governance and Stakeholder Engagement for Resilient Infrastructure: Perspective from ASEAN

Presentation by: Dr. Riyanti Djalante
Assistant Director /Head of Disaster Management and Humanitarian Assistance Division, ASEAN Secretariat
Email: dmha.div@asean.org
via Video-Conference | 20 September 2022
Outline

1. ASEAN Agreement on Disaster Management (AADMER) and AADMER Work Programme 2021-2025
2. Inclusive and integrated governance and policy mechanisms in making infrastructure resilient
ASEAN Agreement on Disaster Management (AADMER) Work Programme 2021-2025

• **VISION**: A region of disaster-resilient nations, mutually assisting and complementing one another, sharing a common bond in minimising adverse effects of disasters in pursuit of safer communities and sustainable development.

• **MISSION**: To enhance and support ASEAN’s disaster risk reduction and disaster management capabilities through inter-sectoral cooperation, capacity building, scalable innovation, resource mobilisation, new partnerships and stronger coordination among the ASEAN Member States.
Guiding Principles

1. **Institutionalisation, Localisation and Communication:** To implement multi-layered and cross sectoral governance approaches that would allow AMS to develop their own disaster management and emergency response strengths at national and sub-national levels and encourage communication exchange among all stakeholders in the ASEAN Community.

2. **Finance and Resource Mobilisation:** To harness both traditional and non-traditional resources in a complementary fashion that supports the full implementation of the AADMER Work Programme and its components.

3. **Gender and Social Inclusion:** To inculcate a whole-of-society approach in disaster management that leaves no one behind by recognising the key roles and unique needs of the communities, especially those that are most affected during disasters including women, children, youth, elderly, the poor and people with disabilities as well as other vulnerable groups.

4. **Multi-Hazards Approach:** Enhance regional capacities to assess, mitigate, prepare for and respond to a wider range of hazards and disaster risks in the region.

5. **Innovation:** To enhance the efficiency and effectiveness of ASEAN’s disaster management and emergency response instruments through the application of science-based approaches and technological advancement, as well as through non-technological innovations, to create better and creative solutions for resilience.

6. **Partnership:** To nurture and develop stronger multi-stakeholder partnership mechanisms through mutually beneficial co-implementation of the AADMER Work Programme 2021-2025.

7. **Synergy:** To ensure strategic actions by ensuring alignment with global frameworks and coherence with regional priorities on disaster management.
AADMER Work Programme 2021-2025: Consideration of Resilient Infrastructure

Sub-Priorities
1. Risk Assessment
2. Early Warning
3. Risk Communication

Sub-Priorities
1. Disaster Risk Reduction & Climate Change Adaptation
2. Resilient Cities and Human Settlements
3. Resilient Economy
4. Resilient Infrastructure
5. Vulnerable Groups and Community-Based Disaster Risk Management (CBDRM)
6. Risk Governance

Sub-Priorities
1. Advance Planning, Coordination, and Diversification of instruments for Regional Preparedness
2. Strengthen Capacity building for an Effective Regional Response.

Sub-Priorities
1. Pre-Disaster Programs on Resilient Recovery
2. Preparedness for Regional Recovery Assistance for Large-Scale Disasters

Sub-Priorities
1. Knowledge Management for Regional Resilience Building
2. Sharing of Regional Knowledge and Experiences to Demonstrate Global Leadership in Disaster Management
Sub-Priority 2.4 Resilient Infrastructure

• Outcome: 2.4.1: Continued improvement of school safety in the region. This outcome aims to sustain the achievements and improve the implementation of previous school safety programme under the previous AADMER Work Programme. It further focuses on establishing stronger school safety programming as well as continuing safe school advocacy on both global and regional levels.

• Outcome: 2.4.2: Enhanced knowledge and capacity on resilience of key infrastructure. Building resilient infrastructure prevents/ mitigates the damage caused by hazards and reduces the potential burden on the recovery phase. The outputs within this outcome covers capacity development and stocktaking of innovations and best practices and sharing of tools.
Advancing infrastructure resilience: ASEAN Safe School Initiative

Pillar 1: Safe Learning Facilities
Pillar 2: School Disaster Management
Pillar 3: Risk Reduction and Resilience Education
Thank you.
